

**UNITED STATES DISTRICT COURT
SOUTHERN DISTRICT OF OHIO
CINCINNATI DIVISION**

VICTORIA LOVETT, individually and on
behalf of all others similarly situated,

Plaintiff,

v.

CONTINUED.COM, LLC,

Defendant.

Civil Action No.
1:24-CV-00590-DRC

CLASS ACTION

DEMAND FOR JURY TRIAL

FIRST AMENDED CLASS ACTION COMPLAINT

INTRODUCTION

Victoria Lovett (“Plaintiff”), individually and on behalf of all others similarly situated, makes the following allegations pursuant to the investigation of counsel and based upon information and belief, except as to allegations pertaining specifically to herself or her counsel, which are based on personal knowledge.

NATURE OF THE CASE

1. Plaintiff brings this action to redress Defendant Continued.com, LLC’s (“Continued”) practices of knowingly disclosing Plaintiff’s and its other customers’ identities, their purchases of a specific video service that grants them access to prerecorded video content, and the specific titles of prerecorded videos requested or obtained to Meta Platforms, Inc. (“Meta”), formerly known as Facebook, Inc. (“Facebook”), in violation of the federal Video Privacy Protection Act (“VPPA”), 18 U.S.C. § 2710 et seq.

2. Over the past two years, Defendant has systematically transmitted (and continues to transmit today) its customers’ personally identifying video viewing information to Meta using a snippet of programming code called the “Meta Pixel,” which Defendant chose to install and configure on its family of websites that include but are not limited to: www.speechpathology.com, www.occupationaltherapy.com, www.audiologyonline.com, and www.physicaltherapy.com (collectively, “Websites”).

3. The information Defendant disclosed (and continues to disclose) to Meta via the Meta Pixel includes the customer's Facebook ID ("FID"), the specific video service that each of its customers purchased on any one of its Websites, and the specific title of every video (prerecorded or not) requested or obtained using that service. An FID is a unique sequence of numbers linked to a specific Meta profile. A Meta profile, in turn, identifies by name the specific person to whom the profile belongs (and also contains other personally identifying information about the person). Entering "Facebook.com/[FID]" into a web browser returns the Meta profile of the person to whom the FID corresponds. Thus, the FID identifies a person more precisely than a name, as numerous persons may share the same name, but each person's Facebook profile (and associated FID) uniquely identifies one and only one person. In the simplest terms, the Meta Pixel installed by Defendant captures and discloses to Meta information that reveals a particular person purchased a video service from Defendant's Websites that provided them total access to prerecorded videos and further reveals the title of every video requested or obtained using that service (hereinafter, "Private Video Information").

4. Defendant disclosed and continues to disclose its customers' Private Video Information to Meta without asking for, let alone obtaining, their consent to these practices.

5. The VPPA clearly prohibits what Defendant has done. Subsection (b)(1) of the VPPA provides that, absent the consumer's prior informed, written consent, any "video tape service provider who knowingly discloses, to any person, personally identifiable information concerning any consumer of such provider shall be liable to the aggrieved person for," 18 U.S.C. § 2710(b)(1), damages in the amount of \$2,500.00, *see id.* § 2710(c).

6. Accordingly, on behalf of herself and the putative Class members defined below, Plaintiff brings this first amended class action complaint against Defendant for intentionally and unlawfully disclosing her and the Putative Class members' Private Video Information to Meta.

PARTIES

I. Plaintiff Victoria Lovett

7. Plaintiff is, and at all times relevant hereto was, a citizen and resident of Brooks County, Georgia.

8. Plaintiff is, and at all times relevant hereto was, a user of Meta.

9. Plaintiff is a consumer of the video products and services offered on Defendant's www.speechpathology.com website. She purchased a specific video service from Defendant's website on or about August 15, 2023, which provided her access to unlimited prerecorded videos for a one-year period. Plaintiff maintained her subscription throughout the term of the plan selected. Plaintiff became a

subscriber to Defendant's website by registering and paying for a video service and providing her email address, payment information, and zip code.

10. On multiple occasions during the two years preceding the filing of this action, Plaintiff used her video service from Defendant's website to request and obtain pre-recorded videos from Defendant.

11. At all times relevant hereto, including when purchasing a video service on Defendant's website and using that service to request and obtain prerecorded video material provided to subscribers on Defendant's website, Plaintiff had a Meta account, a Meta profile, and an FID associated with such profile.

12. When Plaintiff purchased her video service and accessed prerecorded videos from Defendant's website using that service, Defendant disclosed to Meta Plaintiff's FID, the URL identifying the specific video service she purchased, and the title of the specific videos she requested or obtained (and URLs where they are available) using that service among other information about Plaintiff and the device she used to make the purchase.

13. Plaintiff has never consented, agreed, authorized, or otherwise permitted Defendant to disclose her Private Video Information to Meta. In fact, Defendant has never even provided Plaintiff with written notice of its practices of disclosing its customers' Private Video Information to third parties such as Meta.

14. Because Defendant disclosed Plaintiff's Private Video Information (including her FID, the URL identifying the specific video service she purchased, and the specific titles of prerecorded videos she requested or obtained and their accompanying URL) to Meta during the applicable statutory period, Defendant violated Plaintiff's rights under the VPPA and invaded her statutorily conferred interest in keeping such information (which bears on her personal affairs and concerns) private.

II. Defendant Continued.com, LLC

15. Defendant is a foreign limited liability company organized under the laws of the State of Texas. Defendant operates and maintains a family of Websites, where it sells video services that provide unlimited access to prerecorded video content on various topics such as Speech Pathology, Audiology, Physical Therapy, and Occupational Therapy.

JURISDICTION AND VENUE

16. The Court has subject-matter jurisdiction over this civil action pursuant to 28 U.S.C. § 1331 and 18 U.S.C. § 2710.

17. Personal jurisdiction and venue are proper because a substantial portion of Defendant's maintenance, use, and operation of its family of Websites occurs in Hamilton County, within this judicial District.

VIDEO PRIVACY PROTECTION ACT

18. The VPPA prohibits companies (like Defendant) from knowingly disclosing to third parties (like Meta) information that personally identifies consumers (like Plaintiff) as having viewed particular videos or other audio-visual materials.

19. Specifically, subject to certain exceptions that do not apply here, the VPPA prohibits “a video tape service provider” from “knowingly disclos[ing], to any person, personally identifiable information concerning any consumer of such provider[.]” 18 U.S.C. § 2710(b)(1). The statute defines a “video tape service provider” as “any person, engaged in the business . . . of rental, sale, or delivery of prerecorded video cassette tapes or similar audio visual materials,” 18 U.S.C. § 2710(a)(4). It defines a “consumer” as “a renter, purchaser, or subscriber of goods or services from a video tape service provider.” 18 U.S.C. § 2710(a)(1). “[P]ersonally identifiable information” includes information which identifies a person as having requested or obtained specific video materials or services from a video tape service provider.” 18 U.S.C. § 2710(a)(3).

20. Leading up to the VPPA’s enactment in 1988, members of the United States Senate warned that “[e]very day Americans are forced to provide to businesses and others personal information without having any control over where that information goes.” *Id.* Senators at the time were particularly troubled by disclosures of records that reveal consumers’ purchases and rentals of videos and

other audiovisual materials because such records offer “a window into our loves, likes, and dislikes,” such that “the trail of information generated by every transaction that is now recorded and stored in sophisticated record-keeping systems is a new, more subtle and pervasive form of surveillance.” S. Rep. No. 100-599 at 7-8 (1988) (statements of Sens. Simon and Leahy, respectively).

21. Thus, in proposing the Video and Library Privacy Protection Act (which later became the VPPA), Senator Patrick J. Leahy (the senior Senator from Vermont from 1975 to 2023) sought to codify, as a matter of law, that “our right to privacy protects the choice of movies that we watch with our family in our own homes.” 134 Cong. Rec. S5399 (May 10, 1988). As Senator Leahy explained at the time, the personal nature of such information, and the need to protect it from disclosure, is the *raison d’être* of the statute: “These activities are at the core of any definition of personhood. They reveal our likes and dislikes, our interests and our whims. They say a great deal about our dreams and ambitions, our fears and our hopes. They reflect our individuality, and they describe us as people.” *Id.*

22. While these statements rang true in 1988 when the act was passed, the importance of legislation like the VPPA in the modern era of data mining is more pronounced than ever before. During a more recent Senate Judiciary Committee meeting, “The Video Privacy Protection Act: Protecting Viewer Privacy in the 21st Century,” Senator Leahy emphasized the point by stating: “While it is true that

technology has changed over the years, we must stay faithful to our fundamental right to privacy and freedom. Today, social networking, video streaming, the ‘cloud,’ mobile apps and other new technologies have revolutionized the availability of Americans’ information.”¹

23. Former Senator Al Franken may have said it best: “If someone wants to share what they watch, I want them to be able to do so . . . But I want to make sure that consumers have the right to easily control who finds out what they watch—and who doesn’t. The Video Privacy Protection Act guarantees them that right.”²

24. In this case, however, Defendant deprived Plaintiff and numerous other similarly situated persons of that right by systematically (and surreptitiously) disclosing their Private Video Information to Meta, without providing notice to (let alone obtaining consent from) any of them, as explained in detail below.

BACKGROUND FACTS

I. Consumers’ Personal Information Has Real Market Value

25. In 2001, Federal Trade Commission (“FTC”) Commissioner Orson Swindle remarked that “the digital revolution . . . has given an enormous capacity to the acts of collecting and transmitting and flowing of information, unlike anything

¹ The Video Privacy Protection Act: Protecting Viewer Privacy in the 21st Century, Senate Judiciary Committee Subcommittee on Privacy, Technology and the Law, <http://www.judiciary.senate.gov/meetings/the-video-privacy-protection-act-protecting-viewer-privacy-in-the-21stcentury>.

² Chairman Franken Holds Hearing on Updated Video Privacy Law for 21st Century, franken.senate.gov (Jan. 31, 2012).

we've ever seen in our lifetimes . . . [and] individuals are concerned about being defined by the existing data on themselves.”³

26. Over two decades later, Commissioner Swindle’s comments ring truer than ever, as consumer data feeds an information marketplace that supports a 26 billion dollar per year online advertising industry in the United States.⁴

27. The FTC has also recognized that consumer data possesses inherent monetary value within the new information marketplace and publicly stated that:

Most consumers cannot begin to comprehend the types and amount of information collected by businesses, or why their information may be commercially valuable. Data is currency. The larger the data set, the greater potential for analysis – and profit.⁵

28. In fact, an entire industry exists while companies known as data aggregators purchase, trade, and collect massive databases of information about consumers. Data aggregators then profit by selling this “extraordinarily intrusive” information in an open and largely unregulated market.⁶

³ Transcript, *The Information Marketplace* (Mar. 13, 2001), at 8-11, available at https://www.ftc.gov/sites/default/files/documents/public_events/information-marketplace-merging-and-exchanging-consumer-data/transcript.pdf.

⁴ See Julia Angwin and Emily Steel, *Web’s Hot New Commodity: Privacy*, Wall Street Journal (Feb. 28, 2011), available at <https://www.wsj.com/articles/SB10001424052748703529004576160764037920274>.

⁵ Statement of FTC Cmr. Harbour (Dec. 7, 2009), at 2, available at https://www.ftc.gov/sites/default/files/documents/public_statements/remarks-ftc-exploring-privacy-roundtable/091207privacyroundtable.pdf

⁶ See M. White, *Big Data Knows What You’re Doing Right Now*, TIME.com (July 31, 2012), available at <http://moneyland.time.com/2012/07/31/big-data-knows-what-youre-doing-right-now/>.

29. The scope of data aggregators' knowledge about consumers is immense: "If you are an American adult, the odds are that [they] know[] things like your age, race, sex, weight, height, marital status, education level, politics, buying habits, household health worries, vacation dreams—and on and on."⁷

30. Further, "[a]s use of the Internet has grown, the data broker industry has already evolved to take advantage of the increasingly specific pieces of information about consumers that are now available."⁸

31. Recognizing the severe threat the data mining industry poses to consumers' privacy, on July 25, 2012, the co-chairmen of the Congressional Bi-Partisan Privacy Caucus sent a letter to nine major data brokerage companies seeking information on how those companies collect, store, and sell their massive collections of consumer data, stating in pertinent part:

By combining data from numerous offline and online sources, data brokers have developed hidden dossiers on every U.S. consumer. This large[-]scale aggregation of the personal information of hundreds of millions of American citizens raises a number of serious privacy concerns.⁹

⁷ N. Singer, *You for Sale: Mapping, and Sharing, the Consumer Genome*, N.Y. Times (June 16, 2012), available at <https://www.nytimes.com/2012/06/17/technology/acxiom-the-quiet-giant-of-consumer-database-marketing.html#:~:text=It's%20called%20the%20Acxiom%20Corporation,to%20know%20much%20%20much%20more>.

⁸ Letter from Sen. J. Rockefeller IV, Sen. Cmtee. On Commerce, Science, and Transportation, to S. Howe, Chief Executive Officer, Acxiom (Oct. 9, 2012) available at <https://www.commerce.senate.gov/services/files/3bb94703-5ac8-4157-a97b-%20a658c3c3061c>.

⁹ See *Bipartisan Group of Lawmakers Query Data Brokers About Practices Involving Consumers' Personal Information*, Website of Sen. Markey (July 24, 2012), available at

32. Data aggregation is especially troublesome when consumer information is sold to direct-mail advertisers. In addition to causing waste and inconvenience, direct-mail advertisers often use consumer information to lure unsuspecting consumers into various scams, including fraudulent sweepstakes, charities, and buying clubs. Thus, when companies like Continued.com, LLC share information with data aggregators, data cooperatives, and direct-mail advertisers, they contribute to the “[v]ast databases” of consumer data that are often “sold to thieves by large publicly traded companies,” which “put[s] almost anyone within the reach of fraudulent telemarketers” and other criminals.¹⁰

33. Disclosures like Defendant’s are particularly dangerous to the elderly. “Older Americans are perfect telemarketing customers, analysts say, because they are often at home, rely on delivery services, and are lonely for the companionship that telephone callers provide.”¹¹

<https://www.markey.senate.gov/news/press-releases/bipartisan-group-of-lawmakers-query-data-brokers-about-practices-involving-consumers-personal-information>.

¹⁰ See Charles Duhigg, *Bilking the Elderly, with a Corporate Assist*, N.Y. Times (May 20, 2007), available at <https://www.nytimes.com/2007/05/20/business/20tele.html>.

¹¹ *Id.*

34. The FTC notes that “[t]he elderly often are the deliberate targets of fraudulent telemarketers who take advantage of the fact that many older people have cash reserves or other assets to spend on seemingly attractive offers.”¹²

35. Indeed, an entire black market exists while the personal information of vulnerable elderly Americans is exchanged. Thus, information disclosures like Defendant’s are particularly troublesome because of their cascading nature: “Once marked as receptive to [a specific] type of spam, a consumer is often bombarded with similar fraudulent offers from a host of scam artists.”¹³

36. Defendant is not alone in violating its customers’ statutory rights and jeopardizing their well-being in exchange for increased revenue: disclosing customer and subscriber information to data aggregators, data appenders, data cooperatives, direct marketers, and other third parties has become a widespread practice. Unfortunately for consumers, however, this growth has come at the expense of their most basic privacy rights.

II. Consumers Place Monetary Value on Their Privacy and Consider Privacy Practices When Making Purchases

37. As the data aggregation industry has grown, so has consumer concerns regarding personal information.

¹² Prepared Statement of the FTC on “Fraud Against Seniors” before the Special Committee on Aging, United States Senate (August 10, 2000).

¹³ *Id.*

38. A survey conducted by Harris Interactive on behalf of TRUSTe, Inc. showed that 89 percent of consumers polled avoid doing business with companies who they believe do protect their privacy online.¹⁴ As a result, 81 percent of smartphone users polled said that they avoid using smartphone apps that they don't believe protect their privacy online.¹⁵

39. Thus, as consumer privacy concerns grow, consumers increasingly incorporate privacy concerns and values into their purchasing decisions, and companies viewed as having weaker privacy protections are forced to offer greater value elsewhere (through better quality and/or lower prices) than their privacy-protective competitors. In fact, consumers' personal information has become such a valuable commodity that companies are beginning to offer individuals the opportunity to sell their personal information themselves.¹⁶

40. These companies' business models capitalize on a fundamental tenet underlying the personal information marketplace: consumers recognize the economic value of their private data. Research shows that consumers are willing to

¹⁴ See 2014 TRUSTe US Consumer Confidence Privacy Report, TRUSTe, http://www.theagitator.net/wp-content/uploads/012714_ConsumerConfidenceReport_US1.pdf.

¹⁵ *Id.*

¹⁶ See Joshua Brustein, *Start-Ups Seek to Help Users Put a Price on Their Personal Data*, N.Y. Times (Feb. 12, 2012), available at <https://www.nytimes.com/2012/02/13/technology/start-ups-aim-to-help-users-put-a-price-on-their-personal-data.html>.

pay a premium to purchase services from companies that adhere to more stringent policies of protecting their personal data.¹⁷

41. Thus, in today's digital economy, individuals and businesses alike place a real, quantifiable value on consumer data and corresponding privacy rights.¹⁸ As such, where a business offers customers a product or service that includes statutorily guaranteed privacy protections, yet fails to honor these guarantees, the customer receives a product or service of less value than the product or service paid for.

III. Defendant is a Videotape Service Provider

42. Defendant sells video services on each website within its family of websites, which provide each consumer with unlimited access to prerecorded videos hosted on that site.

43. Each video service includes access to prerecorded videos that are accessible in an unlimited fashion during the subscription period. The prerecorded videos are continuing education courses on various topics.

¹⁷ See Tsai, Cranor, Acquisti, and Egelman, *The Effect of Online Privacy Information on Purchasing Behavior*, 22(2) Information Systems Research 254, 254 (2011); see also European Network and Information Security Agency, *Study on Monetizing Privacy* (Feb. 27, 2012), available at <https://www.enisa.europa.eu/publications/monetising-privacy>.

¹⁸ See Hann, et al., *The Value of Online Information Privacy: An Empirical Investigation* (Oct. 2003) at 2, available at <https://www.comp.nus.edu.sg/~ipng/research/privacy.pdf>.

44. The screenshot below depicts an example of the prerecorded on-demand courses that are available in the video service on Defendant's websites:

45. When the video listed above was requested or obtained, Defendant's configuration of the Meta Pixel disclosed the title of the video alongside the consumer's FID. Additionally, the Meta Pixel also disclosed the exact moment that the "play" button was clicked, signifying that the consumer (by contemporaneous disclosure of the FID) took that action directed to the specific video on Defendant's website.

46. Defendant's websites each describe the video service as "mobile-friendly," granting Plaintiff and other consumers access to "continuing

education courses and content anywhere, on any device, including your phone and tablet.”

47. Defendant’s websites also explain that its video service includes a “course library” of prerecorded videos.

48. Each prerecorded video that is available within the video service’s course library is listed on Defendant’s website as shown below:

Every subscription includes:

- Unlimited Access**
Learn on your own schedule, at your own pace, and earn all the CEUs you want.
- Multiple Formats**
We offer courses in multiple formats (live webinar, video, audio, and text) that fit your lifestyle and learning style.
- Mobile-Friendly**
Access continuing education courses and content anywhere, on any device, including your phone and tablet.
- Industry-Leading Experts**
The course library is developed and overseen by an experienced team of speech-language pathologists and industry professionals.
- Trending Topics**
Our content is updated weekly with courses that will give you the skills you need to succeed.
- Learn, Earn, & Track**
See and track your courses at a glance. Course completion certificates are provided. We can send transcripts to ASHA and other associations for reporting.

49. By clicking “Join Now” as shown above, Defendant’s configuration of the Meta Pixel disclosed the consumer’s FID alongside their “subscription” to the total access video service and a custom URL associated therewith.

50. Defendant's speech pathology video service includes access to 606 prerecorded video courses.

51. Defendant's audiology online video service includes access to 1,525 prerecorded video courses.

52. Defendant's occupational therapy video service includes access to 580 prerecorded video courses.

53. Defendant's physical therapy video service includes access to 495 prerecorded video courses.

IV. Defendant Uses the Meta Pixel to Systematically Disclose its Customers' Private Video Information to Meta

54. As alleged below, when a consumer requests or obtains a video service from one of Defendant's Websites, the Meta Pixel technology that Defendant intentionally installed on its Websites transmits (1) the consumer's FID, (2) the specific title of the video service, (3) the specific title of the videos requested or obtained using that package, and (4) the URL where the video service is available for purchase or the specific prerecorded videos are available for viewing, without the consumer's consent and in clear violation of the VPPA.

A. The Meta Pixel

55. On February 4, 2004, Mark Zuckerberg and others launched Facebook, now known as "Meta".¹⁹ Meta is now the world's largest social media platform. To

¹⁹ See Facebook, "Company Info," available at <https://about.fb.com/company-info/>.

create a Meta account, a person must provide, *inter alia*, his or her first and last name, birth date, gender, and phone number or email address.

56. The Meta Pixel, first introduced in 2013 as the “Facebook Pixel,” is a unique string of code that companies can embed on their websites to monitor and track the actions taken by visitors to their websites and to report them back to Meta. This allows companies like Defendant to build detailed profiles about their customers and to serve them with highly targeted advertising.

57. Additionally, a Meta Pixel installed on a company’s website allows Meta to “match [] website visitors to their respective Facebook User accounts.”²⁰ This is because Meta has assigned to each of its users an “FID” number – a unique and persistent identifier that allows anyone to look up the user’s unique Meta profile and thus identify the user by name²¹ – and because each transmission of information made from a company’s website to Meta via the Meta Pixel is accompanied by, *inter alia*, the FID of the website’s visitor. Moreover, the Meta Pixel can follow a consumer to different websites and across the Internet even after the consumer’s browser history has been cleared.

²⁰ Meta, “Get Started – Meta Pixel,” available at <https://developers.facebook.com/docs/meta-pixel/get-started/>.

²¹ For example, Mark Zuckerberg’s FID is reportedly the number “4,” so logging into Facebook and typing www.facebook.com/4 in the web browser retrieves Mark Zuckerberg’s Facebook page: www.facebook.com/zuck, and all of the additional personally identifiable information contained therein.

58. As Meta’s developer’s guide explains, installing the Meta Pixel on a website allows Meta to track actions that users with Meta accounts take on the site. Meta states that “Examples of [these] actions include adding an item to their shopping cart or making a purchase.”²²

59. Meta’s Business Tools Terms govern the use of Meta’s Business Tools, including the Meta Pixel.²³

60. Meta’s Business Tools Terms state that website operators may use Meta’s Business Tools, including the Meta Pixel, to transmit the “contact information” and “event data” of their website’s visitors to Meta.

61. Meta’s Business Tools Terms define “contact information” as “information that personally identifies individuals, such as names, email addresses, and phone numbers”²⁴

62. Meta’s Business Tools Terms state: “You instruct us to process the contact information solely to match the contact information against user IDs [e.g., FIDs] (“Matched User IDs”), as well as to combine those user IDs with corresponding event data.”²⁵

²² Meta, “About Meta Pixel,” available at <https://www.facebook.com/business/help/742478679120153?id=1205376682832142>.

²³ Meta, “Meta Business Tools Terms,” available at https://www.facebook.com/legal/technology_terms.

²⁴ *Id.*

²⁵ *Id.*

63. The Business Tools Terms define “event data” as, *inter alia*, “information that you share about people and the actions that they take on your websites and apps or in your shops, such as visits to your sites, installations of your apps, and purchases of your products.”²⁶

64. Website operators use the Meta Pixel to send information about visitors to their websites to Meta. Every transmission to Meta accomplished through the Meta Pixel includes at least two elements: (1) the website visitor’s FID and (2) the webpage’s URL triggering the transmission.

65. Depending on the configuration of the Meta Pixel, the website may also send event data to Meta. Defendant has configured the Meta Pixel on its Websites to send event data to Meta, such as Page View, Subscribe, “Play” button click to initiate a video starting, and more.

66. When website operators make transmissions to Meta through the Meta Pixel, neither the visitor’s FID, the website URL, nor the event data are hashed or encrypted.

67. Every website operator installing the Meta Pixel must agree to the Meta Business Tools Terms.²⁷

68. Moreover, the Meta Pixel can follow a consumer to different websites and across the Internet even after the consumer’s browser history has been cleared.

²⁶ *Id.*

²⁷ *See id.*

69. Meta has used the Meta Pixel to amass a vast digital database of dossiers comprised of highly detailed personally identifying information about each of its billions of users worldwide, including information about all of its users' interactions with any of the millions of websites across the Internet on which the Meta Pixel is installed. Meta then monetizes this Orwellian database by selling advertisers the ability to serve highly targeted advertisements to the persons whose personal information is contained within it.

70. Simply put, if a company chooses to install the Meta Pixel on its website, both the company who installed it and Meta (the recipient of the information it transmits) are then able to “track [] the people and type of actions they take,”²⁸ including, as relevant here, the video service and any video accessed under that package on any one of Defendant's Websites.

B. Defendant Knowingly Uses the Meta Pixel to Transmit the Private Video Information of its Customers to Meta

71. Defendant's video service specifically includes exclusive access to prerecorded video content including a video library of on-demand videos, courses, and continuing education.

72. To purchase a video service to access prerecorded video material on any one of Defendant's Websites, a person must provide at least his or her name,

²⁸ Meta, “Retargeting: How to Advertise to Existing Customers with Ads on Facebook,” available at https://www.facebook.com/business/goals/retargeting?checkpoint_src=any.

email address, billing address, and credit or debit card (or other form of payment) information.

73. When a consumer is purchasing the video service to gain access to the prerecorded videos on any one of Defendant's Websites, Defendant uses—and has used at all times relevant hereto—the Meta Pixel to disclose to Meta the unencrypted FID of the purchaser and the fact that the person is requesting or obtaining a video service from Defendant's website.

74. After purchasing access to Defendant's website by way of the video service, Defendant uses—and has used at all times relevant hereto—the Meta Pixel to disclose to Meta the unencrypted FID of the subscriber and the titles of the specific videos requested or obtained on Defendant's website.

75. Defendant intentionally programmed its websites (by following step-by-step instructions from Meta's website) to include a Meta Pixel that systematically transmits to Meta the FIDs of its purchasers and subscribers, the title of the video service, the titles of the videos requested or obtained, and the URL where the video service and videos are available in order to take advantage of the targeted advertising and other informational and analytical services offered by Meta.

76. With only a person's FID and the knowledge that a person purchased a total access video service on Defendant's website—all of which Defendant knowingly provides to Meta—any ordinary person could learn the identity of the

person to whom the FID corresponds and the specific video services that this person requested. This can be accomplished simply by accessing the URL [www.facebook.com/\[unencrypted FID\]/](http://www.facebook.com/[unencrypted FID]/). However, Defendant's configuration of the Meta Pixel goes further and discloses the titles of the specific videos requested or obtained by a subscriber after the total access video service is purchased. Thus, Defendant's disclosure informs any ordinary person of a consumer's (1) FID, (2) their purchase of a total access subscription to Defendant's video service (including the URL where it is available for purchase), (3) the specific videos requested or obtained using that video service (including the URL where each video is available for viewing).

77. Defendant's practices of disclosing that Plaintiff and members of the Classes purchased video services on any one of Defendant's websites and the titles of the videos requested or obtained using that video service to Meta continued unabated for the full duration of the time period relevant to this action. At all times relevant hereto, whenever Plaintiff or another consumer of Defendant's family of websites requested or obtained a particular video service (by clicking on it) or requested or obtained a prerecorded video from any one of Defendant's Websites, Defendant disclosed to Meta that (*inter alia*) the consumer requested or obtained a total access subscription to video services and later reveals the titles of the specific video requested or obtained using that video service, along with the FID of the

consumer who requested it (which, as discussed above, uniquely identifies the person).

78. At all relevant times, Defendant knew the Meta Pixel disclosed its subscribers' Private Video Information to Meta.

79. Defendant could easily have programmed its websites so that none of its subscribers' detailed Private Video Information is disclosed to Meta. Instead, Defendant chose to program its websites so that all of its subscribers' detailed Private Video Information is sent to Meta *en masse*.

80. Prior to transmitting its subscribers' Private Video Information to Meta, Defendant failed to notify Plaintiff or any of its other subscribers that it would do so, and neither Plaintiff nor any of its other subscribers have consented (in writing or otherwise) to these practices.

81. By intentionally disclosing to Meta Plaintiff's and its other subscribers' FIDs together with information that they each purchased a total access subscription to a video service on any one of Defendant's websites and the titles of videos requested or obtained using that service, without any of their consent to these practices, Defendant knowingly violated the VPPA on an enormous scale.

CLASS ACTION ALLEGATIONS

82. Plaintiff seeks to represent a class defined as all persons in the United States who, during the two years preceding the filing of this action, purchased a

video service on any one of Defendant's websites and accessed prerecorded videos using that service while maintaining an account with Meta Platforms, Inc. f/k/a Facebook, Inc.

83. Class members are so numerous that their individual joinder herein is impracticable. On information and belief, members of the Class number in at least the tens of thousands. The precise number of Class members and their identities are unknown to Plaintiff at this time but may be determined through discovery. Class members may be notified of the pendency of this action by mail and/or publication through the membership records of Defendant.

84. Common questions of law and fact exist for all Class members and predominate over questions affecting only individual class members. Common legal and factual questions include but are not limited to (a) whether Defendant embedded Meta Pixel on its Websites that monitors and tracks actions taken by visitors to its Website; (b) whether Defendant reports the actions and information of visitors to Meta; (c) whether Defendant knowingly disclosed Plaintiff's and Class members' Private Video Information to Meta; (d) whether Defendant's conduct violates the Video Privacy Protection Act, 18 U.S.C. § 2710; and (e) whether Plaintiff and Class members are entitled to a statutory damage award of \$2,500, as provided by the VPPA.

85. The named Plaintiff's claims are typical of the claims of the Class in that the Defendant's conduct toward the putative class is the same. That is, Defendant embedded Meta Pixel on its Websites to monitor and track actions taken by consumers on its Websites and report this to Meta. Further, the named Plaintiff and the Class members suffered invasions of their statutorily protected right to privacy (as afforded by the VPPA), as well as intrusions upon their private affairs and concerns that would be highly offensive to a reasonable person, as a result of Defendant's uniform and wrongful conduct in intentionally disclosing their Private Purchase Information to Meta.

86. Plaintiff is an adequate representative of the Class because she is interested in the litigation; her interests do not conflict with those of the Class members she seeks to represent; she has retained competent counsel experienced in prosecuting class actions; and she intends to prosecute this action vigorously. Plaintiff and her counsel will fairly and adequately protect the interests of all Class members.

87. The class mechanism is superior to other available means for the fair and efficient adjudication of Class members' claims. Each individual Class member may lack the resources to undergo the burden and expense of individual prosecution of the complex and extensive litigation necessary to establish Defendant's liability. Individualized litigation increases the delay and expense to all parties and multiplies

the burden on the judicial system presented by this case’s complex legal and factual issues. Individualized litigation also presents a potential for inconsistent or contradictory judgments. In contrast, the class action device presents far fewer management difficulties and provides the benefits of single adjudication of the common questions of law and fact, economy of scale, and comprehensive supervision by a single court on the issue of Defendant’s liability. Class treatment of the liability issues will ensure that all claims and claimants are before this Court for consistent adjudication of the liability issues.

CAUSE OF ACTION
Violation of the Video Privacy Protection Act, 18 U.S.C. § 2710

88. Plaintiff repeats the allegations asserted in the preceding paragraphs as if fully set forth herein.

89. The VPPA prohibits a “video tape service provider” from knowingly disclosing “personally identifying information” concerning any “consumer” to a third party without the “informed, written consent (including through an electronic means using the Internet) of the consumer.” 18 U.S.C. § 2710.

90. As defined in 18 U.S.C. § 2710(a)(4), a “video tape service provider” is “any person, engaged in the business, in or affecting interstate or foreign commerce, of rental, sale, or delivery of prerecorded video cassette tapes or similar audiovisual materials[.]” Defendant is a “video tape service provider” as defined in 18 U.S.C. § 2710(a)(4) because it is engaged in the business of selling and delivering

prerecorded video materials, similar to prerecorded video cassette tapes, to consumers nationwide.

91. As defined in 18 U.S.C. § 2710(a)(1), a “‘consumer’ means any renter, purchaser, or consumer of goods or services from a video tape service provider.” As alleged above, Plaintiff and Class members are each a “consumer” within the meaning of the VPPA because they each purchased a subscription to a total access video service and requested or obtained prerecorded videos from one of Defendant’s Websites that were sold and delivered to them by Defendant.

92. As defined in 18 U.S.C. § 2710(a)(3), “‘personally identifiable information’ includes information which identifies a person as having requested or obtained specific video materials or services from a video tape service provider.” The Private Video Information that Defendant transmitted to Meta constitutes “personally identifiable information” as defined in 18 U.S.C. § 2710(a)(3) because it identified Plaintiff and Class members to Meta as an individual who purchased, and thus “requested or obtained,” a subscription to a total access video services from one of Defendant’s Websites and it later identified the specific prerecorded video content requested or obtained using that service.

93. Defendant knowingly disclosed Plaintiff’s and Class members’ Private Video Information to Meta via the Meta Pixel technology because Defendant intentionally installed and programmed the Meta Pixel code on its Websites,

knowing that such code would transmit that total access to a video service was purchased and later the titles of the specific prerecorded videos requested or obtained using that service, which were disclosed each alongside the consumers' unique identifiers (including FIDs and device information).

94. Defendant failed to obtain informed written consent from Plaintiff or Class members authorizing it to disclose their Private Video Information to Meta or any other third party. More specifically, at no time prior to or during the applicable statutory period did Defendant obtain from any person who purchased a subscription to access prerecorded video material or services on its Websites (including Plaintiff or Class members) informed, written consent that was given in a form distinct and separate from any form setting forth other legal or financial obligations of the consumer, that was given at the time the disclosure is sought or was given in advance for a set period of time, not to exceed two years or until consent is withdrawn by the consumer, whichever is sooner, or that was given after Defendant provided an opportunity, in a clear and conspicuous manner, for the consumer to withdraw consent on a case-by-case basis or to withdraw consent from ongoing disclosures, at the consumer's election. *See* 18 U.S.C. § 2710(b)(2).

95. By disclosing Plaintiff's and Class members' Private Video Information, Defendant violated their statutorily protected right to privacy in their Private Video Information.

96. Consequently, Defendant is liable to Plaintiff and Class members for damages in the statutorily set sum of \$2,500. 18 U.S.C. § 2710(c)(2)(A).

PRAYER FOR RELIEF

WHEREFORE, Plaintiff, individually and on behalf of all others similarly situated, seeks a judgment against Defendant Continued.com, LLC as follows:

- a) For an order certifying the Class under Rule 23 of the Federal Rules of Civil Procedure and naming Plaintiff as the representative of the Class and Plaintiff's attorneys as Class Counsel to represent the Class;
- b) For an order declaring that Defendant's conduct as described herein violated the VPPA;
- c) For an order finding in favor of Plaintiff and the Class and against Defendant on all counts asserted herein;
- d) For an award of \$2,500.00 to Plaintiff and each Class member, as provided by 18 U.S.C. § 2710(c);
- e) For an order permanently enjoining Defendant from disclosing the Private Video Information of its subscribers to third parties in violation of the VPPA;
- f) For prejudgment interest on all amounts awarded; and

g) For an order awarding punitive damages, reasonable attorneys' fees, and costs to counsel for Plaintiff and the Class under Rule 23 and 18 U.S.C. § 2710(c).

Respectfully submitted,
